All,
We need to see what is needed so that we can move the process and complete the RI/FS. If the PRPs and their contractor are not responsive or taking too long, we need to use the enforcement tools that are available to us (EPA) under Superfund. CAS

Gloria, as you requested yesterday, following is a very short paragraph concerning the information we need from the PRP's contractors in order to continue the RI/FS for the Site. Gary, we could also include "removal" here as well if you like. I had initially thought about requesting hard copies of final documents, but I think that might be too much paper that would have to be reproduced. Is there anything else you can think of that we should be asking for since this should be the only time we make such a request. Also, I don't know how much information BNC Engineering would have or if all the data was transferred to Kleinfelder. Let me know what you think:

"The EPA requires all electronic files of the information gathered by the

contractors for the purpose of conducting the RI/FS for the PRP under the terms of the AOC. These files include the information stored in any digital format for word processing, graphics design, and other computer-based applications (e.g., WordPerfect [.wpd], MS Word [.doc], Adobe PDF [.pdf]), MS Access [.mdb], MS Power Point [.ppt], graphics and imaging software [.bmp, .tif, .gif, etc], MS Excel [.xls], GIS applications [.mxd, .dbf, .shp], Visual Sample Plan [.vsp], and others). These files, and other types of digital files, are needed in order to effectively reproduce and integrate the work accomplished by the PRP's contractors into the work that the EPA will perform to continue the RI/FS for the Site."
